Attention: Karen Stone, Executive Director

Dear Karen Stone,

Re: Revenue from Roof Top Licenses

As you know, BC Housing is interested in working with BC Non-Profit Housing Association to develop an implementation and communications strategy around the use of revenues for housing providers related to roof top telecommunication licenses.

Currently, many operating agreements between BC Housing and non-profit housing providers require revenue to be reported and credited against any subsidy payments by BC Housing. In the area of roof top space licenses to telecommunications companies, we feel that there is an opportunity to better support housing providers by enabling them to retain the net revenue from these sources. This will provide an incentive for non-profits to consider this type of revenue opportunity.

We would like to work in collaboration with BC Non-Profit Housing Association to get this message out to the non-profits and to work out implementation details.

Thank you for your interest in this issue.

Yours truly,

Craig Crawford  
Vice President, Development Services

cc. BC Housing Executive Committee
